

Compress Assembly

Purpose

Compress Assembly is a simple tool for collecting NX part files and compressing them into a single archive file.

Function

Compress Assembly makes use of modern, familiar NX user interface elements for parameter selections and open-source 7zip program for compression.

Releases

- 1.0.0 – Initial release.
- 1.0.1 – Handled exception when 7zip version is a string.
- 1.0.2 – Removed check for and use of installed 7zip. Added version number to dialog title.
- 1.0.3 – Revised to support large assemblies.
- 1.0.4 – Moved version number to log file, added Select Work Assembly button, added environment variables for configuration.
- 1.0.5 – Bug fix, added check for open parts.
